01 · Company Snapshot

Legal Name	GPL Solutions (Pty) Ltd
Established	2017
Head Office	Unit 9, 152 Bram Fischer Drive, Blairgowrie, Randburg, 2194
Regional Presence	Gauteng (Randburg) and KwaZulu-Natal (Umhlanga Ridge)
Core Focus	Automation components, machinery spares, electrical control, pneumatics, consumables
Sector Experience	Manufacturing, Mining, Automotive, Food & Beverage, Packaging, Water & Utilities
Client Base	Private industry and public-sector procurement
Delivery Footprint	Nationwide across South Africa, with regional consolidation
Contact	+27 10 595 4004 · info@gplsolutions.co.za · www.gplsolutions.co.za

02 · About GPL Solutions

GPL Solutions is a South African industrial supply and technical sourcing business established in 2017. We operate as a single point of contact for production, maintenance and procurement teams that need automation components, machinery spares, electrical control gear, pneumatics and workshop consumables — sourced quickly and accurately from a wide industrial supplier network.

Our approach is practical and engineering-led. We do not simply quote against a part number; we help identify the correct component from a photograph, nameplate or sample, cross-reference between OEM and equivalent options, validate electrical and mechanical specifications, and confirm availability before committing to lead times. The objective is to reduce downtime, consolidate suppliers and remove the guesswork from procurement.

Over the years we have supported clients across manufacturing, mining, automotive, food & beverage, packaging and utilities — and we routinely assist with obsolete, legacy and hard-to-find items where the original OEM channel is no longer available.

03 · Mission, Vision & Values

Mission

To keep South African industry running by sourcing the right industrial and automation parts, accurately and responsively, through a trusted supplier network.

Vision

To be the preferred technical sourcing partner for maintenance and procurement teams in Southern Africa — recognised for engineering accuracy, supplier reach and dependable client support.

Core Values

- **Accuracy first.** Verified part numbers, validated specifications, no guesswork.
- **Responsiveness.** Fast acknowledgement, fast quote support, clear lead times.
- **Practical engineering.** Real solutions for real plant conditions.
- **Supplier transparency.** Honest sourcing context — OEM, equivalent or obsolete trace.
- **Long-term client support.** Re-orders, documentation and follow-up that procurement can rely on.

04 · Core Services

Automation Sourcing	PLCs, HMIs, AC/DC drives, servos, I/O modules, industrial PCs and complete control hardware — including obsolete and hard-to-find parts traced through our supplier network.
Machinery Spares & Support	OEM and equivalent spares for motors, gearboxes, bearings, sensors, couplings, switchgear and mechanical wear items to keep production lines running.
Electrical Components	Contactors, relays, circuit protection, terminals, cable, enclosures and panel-building components from a wide industrial supplier network.
Pneumatics & Air Preparation	Cylinders, valves, manifolds, fittings, FRLs and tubing for production and packaging lines.
Consumables & Workshop Supply	Lubricants, fasteners, adhesives, abrasives, PPE and general consumables on once-off, recurring or bulk basis.
Technical Procurement Support	Part-number cross-reference, vendor consolidation, BOM clean-up and responsive quoting for procurement teams.
Obsolete & Hard-to-Find Parts	Tracing of discontinued automation hardware, legacy electronics and machine spares through specialist channels.
Project & Maintenance Support	Material handling components, gravity rollers, control-panel refurbishment parts and planned-maintenance kits.

05 · Product Categories

Our catalogue is organised around the components most often needed by production, maintenance and panel-building teams. Each category is supported by multiple suppliers, with OEM and equivalent options where available.

AUT	Automation & PLCs	Programmable controllers, CPUs, I/O modules, communication cards, HMIs, industrial PCs, operator panels, remote I/O and gateway devices.
DRV	Drives & Motors	Variable speed drives, servo amplifiers and motors, soft starters, AC and DC motors, geared motors, brake units and motor accessories.
SNS	Sensors & Safety	Photoelectric, inductive, capacitive and ultrasonic sensors; encoders; safety light curtains, interlocks, e-stops and safety relays.
ELC	Electrical Control	Contactors, overloads, relays, timers, miniature and moulded-case circuit breakers, surge protection, terminals, fuses and busbar.
PNU	Pneumatics	Compact and ISO cylinders, solenoid valves, manifolds, fittings, tubing, FRLs and air preparation accessories.
CON	Consumables	Industrial lubricants, fasteners, adhesives, sealants, abrasives, cleaning chemicals, PPE and general workshop supplies.
SPR	Machinery Spares	Bearings, belts, chains, couplings, gears, sprockets, seals and standard mechanical wear parts.
OBS	Obsolete & Hard-to-Find	Discontinued PLC and drive hardware, legacy electronics, end-of-life sensors and out-of-production machine components traced through specialist channels.
MTH	Material Handling	Gravity rollers, conveyor accessories, roller frames and replacement components for warehouse and production handling lines.
INS	Instrumentation	Pressure, temperature and flow instruments, transmitters, gauges and process control accessories.

06 · Supplier Network & Brands

We work with a wide industrial supplier network to source components across the leading automation, electrical and motion-control brands. Items are quoted on an OEM, equivalent or traced-obsolete basis depending on availability and client preference.

Automation & Control	Mitsubishi Electric · Siemens · Allen-Bradley · Omron · Schneider Electric · Beckhoff
Drives & Motors	ABB · Danfoss · SEW-Eurodrive · WEG · Yaskawa · Lenze
Sensors & Safety	Pepperl+Fuchs · Sick · Pilz · Banner · Leuze · Keyence
Electrical Components	Phoenix Contact · Weidmüller · Wago · Eaton · Legrand · Hager
Pneumatics & Motion	Festo · SMC · Parker · Camozzi · Norgren · Aventics
Mechanical & Bearings	SKF · NSK · FAG · Timken · Gates · Optibelt

Sourcing disclaimer. Brand names are referenced for sourcing context only. GPL Solutions does not claim official distributor, agent or partnership status with the brands listed. Equivalent parts are offered transparently and only where suitable for the application.

07 · Industries We Support

Manufacturing	Production-line spares, automation upgrades, panel components and planned-maintenance kits across general manufacturing plants.
Mining	Heavy-duty motors, switchgear, sensors and rugged consumables suited to harsh, dusty and high-vibration environments.
Automotive	Servo drives, robotics support parts, conveyor and material-handling components for assembly and body-shop environments.
Food & Beverage	Hygienic-design components, food-grade lubricants, washdown-rated sensors and stainless pneumatics.
Packaging	High-cycle sensors, PLCs, servo systems and pneumatics for form-fill-seal and labelling lines.
Water & Utilities	Pumps, motor controls, instrumentation and panel components for treatment plants and pump stations.
Warehousing & Logistics	Gravity rollers, conveyor spares and control devices for material handling installations.
Public Sector & Parastatals	Tender-compliant supply, documentation and consolidated quoting for government-aligned procurement.

Companies & manufacturing environments supported. Our team has supplied components into automotive and manufacturing environments including Toyota, Ford, Isuzu, GZI and Shatterprufe. These references describe sourcing experience only and do not imply official supplier, partner or endorsement status with the listed companies.

08 · Machine Support Process

01	Breakdown / Request	Client raises a fault, wear item or planned-maintenance requirement from the line.
02	Identify Part	We help identify the exact component from a photograph, nameplate, model or sample.
03	Source Replacement	We check OEM and equivalent options across our supplier network, including obsolete tracing.
04	Quote	Firm pricing, lead times and any technical notes are returned to the client's nominated contact.
05	Supply	Consolidated delivery to site, nationwide, with documentation.
06	Support	Post-supply follow-up, re-order assistance and records maintained for the next request.

09 · Technical Sourcing Capabilities

- **Part identification** from photo, nameplate, drawing or physical sample.
- **Cross-reference** between OEM and equivalent components with documented rationale.
- **Obsolete & legacy tracing** via specialist channels and global supplier network.
- **BOM clean-up** and supplier consolidation for maintenance store rooms.
- **Vendor rationalisation** — fewer POs, fewer accounts, one technical contact.
- **Project pack lists** for control-panel builds, line upgrades and shutdowns.
- **Documentation support** — datasheets, certificates and delivery notes on request.

10 · Why Choose GPL Solutions

Established in 2017 Trading record across multiple sectors and tender environments.	Automation & machinery focus Specialised in PLCs, drives, control gear and machine spares — not a generic catalogue reseller.
Public & private sector support Experienced supplying both government-aligned and private industrial clients.	Obsolete & hard-to-find sourcing We trace discontinued and legacy parts through our supplier network.
Technical part identification Send a photo or nameplate — we cross-reference and verify specs before quoting.	Industrial supplier network Wide network of OEM resellers and trade suppliers across multiple regions.
Responsive quote support Practical turnaround on RFQs, with clear lead times and substitution options where relevant.	Single point of contact One technical contact across automation, electrical, pneumatic and consumable lines.

11 · Quality, Delivery & Logistics

- **Verified suppliers.** We work with established OEM resellers and trade suppliers; parts are confirmed before commitment.
- **OEM, equivalent or traced-obsolete** options clearly identified on every quote.
- **Nationwide delivery** across South Africa using established courier and freight partners.
- **Consolidated shipments** where possible, to reduce admin and freight cost for the client.
- **Documentation on request** — delivery notes, datasheets and certificates where available from the source supplier.
- **Lead-time transparency.** If a part is on long lead, we say so up front and present alternatives.

12 · Common Service Scenarios

Production-line breakdown	Photo or nameplate of failed component is sent to GPL. We identify the part, source OEM or equivalent, quote and deliver to site as fast as availability allows.
Control-panel refurbishment	We supply contactors, breakers, terminals, PLC hardware, sensors and cable accessories as a consolidated pack list for the panel-builder.
Obsolete drive or PLC replacement	Where the OEM channel is end-of-life, we trace remaining stock or propose a documented equivalent / upgrade path.
Maintenance store top-up	Recurring supply of bearings, belts, lubricants, fasteners and PPE on a planned basis to keep the store room stocked.
Project / shutdown supply	Coordinated supply of mixed automation, electrical and mechanical items against a project BOM, with consolidated delivery.

13 · What to Send for a Fast Quote

✓ Brand / OEM name
✓ Full part or model number (and serial where relevant)
✓ Voltage, current or mechanical rating
✓ Quantity required
✓ Urgency — breakdown, planned maintenance or project
✓ Delivery address and contact
✓ Photograph of the label, nameplate or component
✓ Existing supplier reference (if cross-referencing)

14 · Compliance & Standard Terms

- Quotations are valid for 7 days unless otherwise stated, subject to stock and exchange-rate movement.
- Lead times are indicative and confirmed at the point of order acceptance.
- Equivalent parts are offered transparently and only where suitable for the stated application.
- Returns on correctly supplied items are subject to supplier policy and may attract a handling fee.
- GPL Solutions does not claim official distributor or partnership status with any referenced brand.
- Tax invoices, delivery notes and supporting documentation are provided on dispatch.

15 · Contact & RFQ

Send your RFQ

Email a part list, nameplate photo or BOM to our team and we will respond with quote, lead time and substitution options where relevant.
